### DETAILED ACTION

The disclosure is objected to because of the following informalities: In paragraph 0025 of the specification, line 12, reference numeral 41 is inaccurate.

Appropriate correction is required.

Claims 4, 9, 10 and 12 are objected to because of the following informalities: In claim 4, line 2, --operatively—should be inserted before “connected”, since the cam and sleeve in figure 9 are not connected to one another. In claim 9, line 23, “rotates” is inaccurate with respect to claim 12 which depends from claim 9, that is, the linear belt in claim 12 and as shown in figure 15 does not rotate, as is claimed in claim 9, line 23. Applicant may correct this issue by replacing “rotates” with --actuates-- in claim 9, line 23. In claim 10, line 2, --generally—should be inserted before “circular”, since the member 40 in figure 13 is not circular. Appropriate correction is required.

Provided the above claim objections are overcome, claims 1-15 would be allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
